URBAN MEN'S STORE

Upgrade Your Style

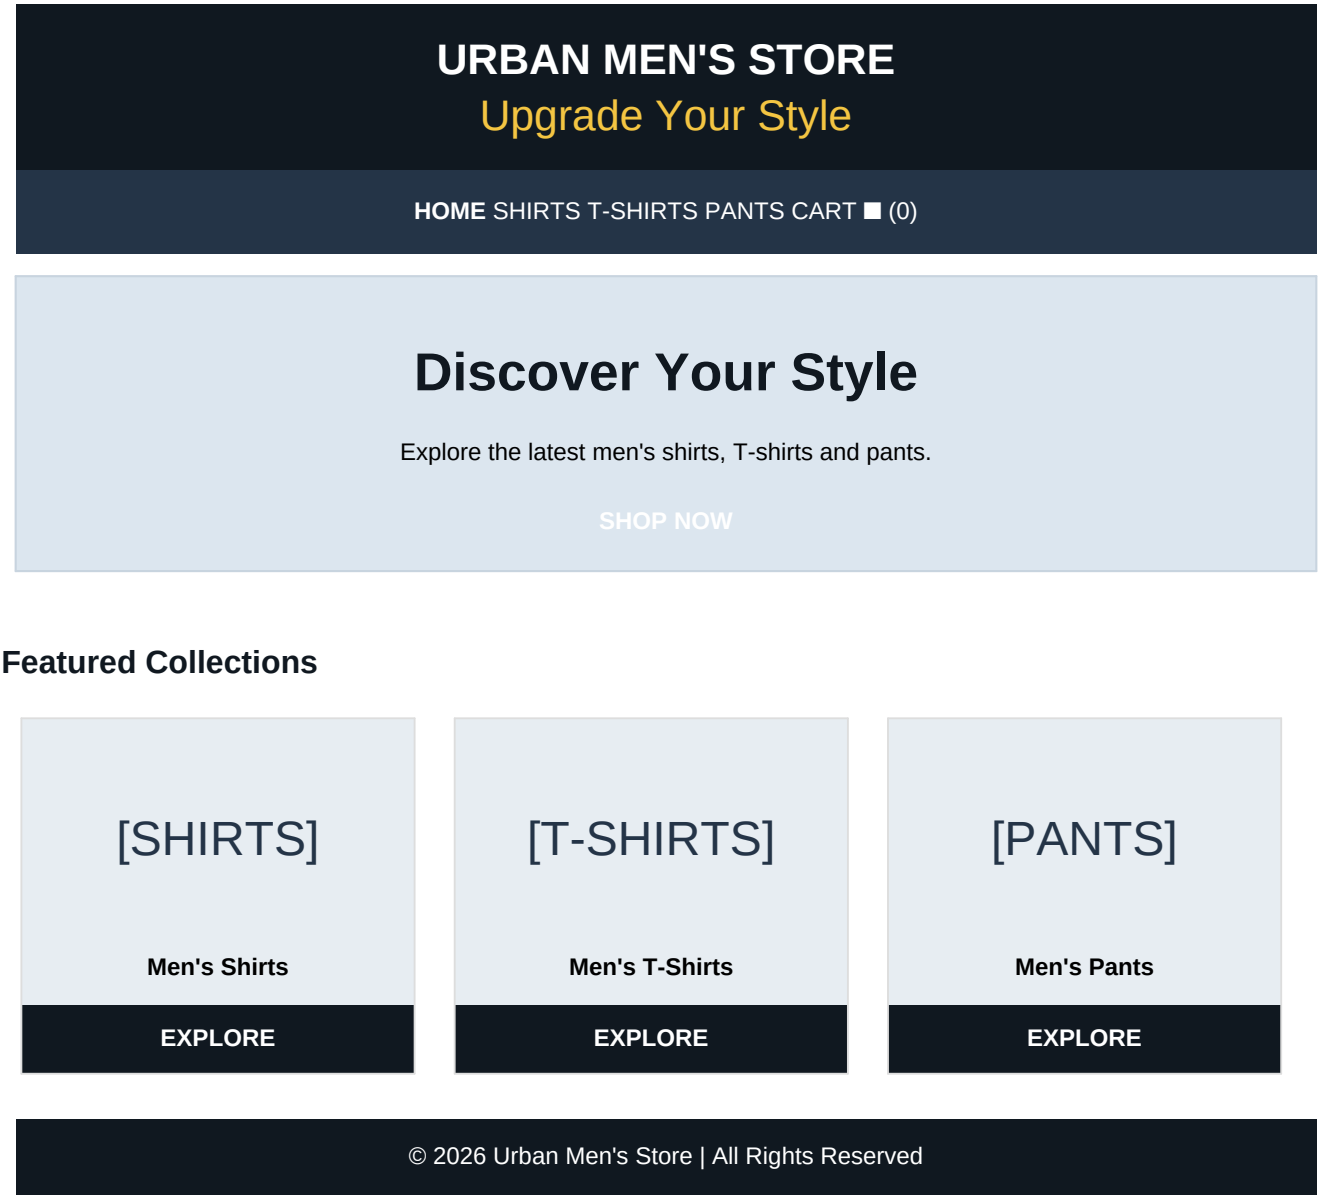
Complete HTML, CSS and JavaScript code with sample website output

Project	Responsive men's clothing shopping website.
Categories	Shirts, T-Shirts and Pants.
Features	Product cards, Add to Cart, cart count, Remove, total calculation and demo checkout.
Technologies	HTML, CSS and JavaScript.

Output previews are illustrative. The live website loads product photos from the external image links in the code.

1. Website Output – Home Page

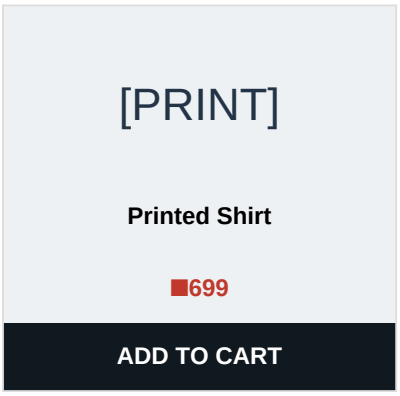
The home page contains the store heading, navigation bar, promotional banner and featured collections.



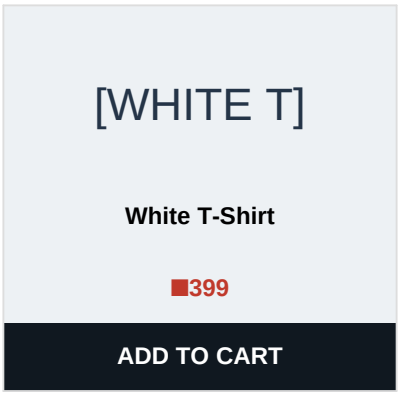
2. Product Collection Output

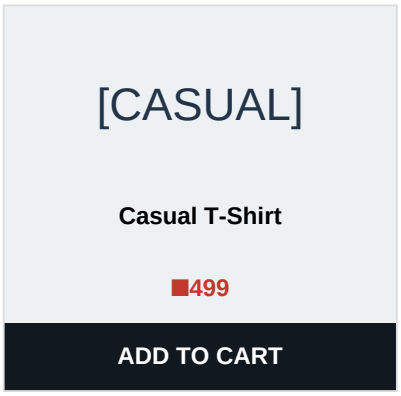
Each category displays three product cards with an image, name, price and Add to Cart button.

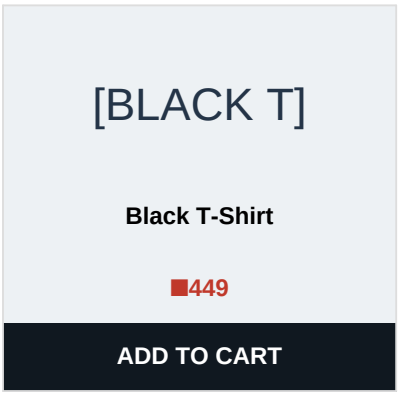
Men's Shirts Collection



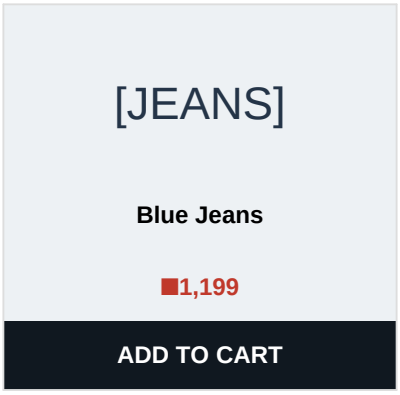
Men's T-Shirts Collection

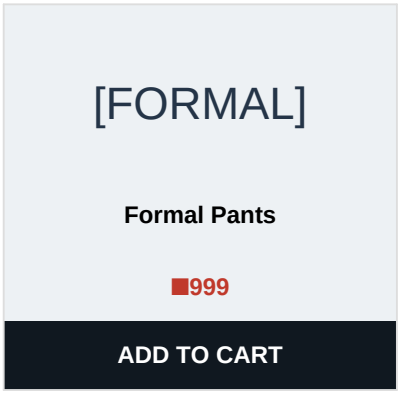






Men's Pants Collection





3. Sample Shopping Cart Output

Example: add one Blue Casual Shirt (■799) and one White T-Shirt (■399). The cart count becomes 2 and the total is ■1,198.

Shopping Cart	Action
Blue Casual Shirt – ■799	Remove
White T-Shirt – ■399	Remove

Total: ■1,198

When Place Order is clicked, a demo confirmation appears with the total. The cart is cleared and the website returns to the home page. This is a front-end demonstration and does not process real payments.

4. Complete Source Code (HTML + CSS + JavaScript)

Save this code as **index.html** and open it in a browser. Product photos are loaded from external Unsplash links and need an internet connection.
